To whom it may concern

J.J. MacKay Canada Ltd requests a permissive change to FCC ID: ZPZ0213MGSOLO (IC ID: 9753A-MGSOLO) to add GSM module FCC ID: RI7CE910-DUAL (IC ID: 5131A-CE910DUAL).

The following changes have been made to the originally certified product to incorporate the noted GSM module into the product:

- the module FCC ID: RI7CE910-DUAL is incorporated onto a new daughter board that plugs into the existing main board.
- the new daughterboard incorporates an antenna detection circuit to detect presence/absence of the antenna cable.
- the antenna now incorporates corresponding passive antenna detect components.

Other than the previously noted changes, the product is electrically equivalent to the original certified product.

Yours Sincerely

Greg Chauvin, CET
Director of Engineering
